La maison

WHERE THE HEART IS

A cinematic vision of luxury living, *Entertainer's Dream* by Lori Morris is designed as a fully immersive environment that invites indulgence in every detail. A sculptural, curved staircase, wrapped in deep blue textured walls and illuminated by a cascading crystal chandelier, sets a dramatic tone upon entry, leading into a jewel-box lounge layered with custom, curved velvet seating, brass accents, and richly patterned textiles. At the center, a high-gloss blue bar with a curved marble countertop and mirrored shelving anchors the space, seamlessly connecting the theater and pool room. The theater offers tiered velvet seating, enveloping drapery, and a fourteen-foot projection screen for a true cinematic experience, while the opposing game room features bold artwork, a sculptural chandelier, and a custom-felted pool table that integrates effortlessly into the palette. The result is a master class in layered luxury, where architecture, art, and entertainment converge in a setting designed for unforgettable evenings.
